Charles Magee Considered for Federal Jobs

Seeks to be United States Attorney in North.

California Senators Alarmed Get Busy.

WASHINGTON, June 1.—Charles A. A. Magee, a prominent lawyer of Alameda, and with powerful friends n Pittsburg and other points in the East, is the latest candidate to be considered for United States Attorney in the northern district of Cali-fornia. It is believed here that unless prompt action be taken by the Senators from California the Department of Justice will on its own initiative fill the vacancy new existing. Such progress has been made by the friends of the latest candidate for this important position that both California Senators are on the alert and hope to agree upon a nomination within the next few days.

SEEKS CONFERENCE. SEEKS CONFERENCE.

Senator Shortridge sought to confer with Senator Johnson on this appointment and some other matters of patronage but was unable to make any progress for the reason that Johnson was not in Washington and up to a late hour tonight there had been no conference between the two Senators. Quite a number of places in the north must soon be filled and an immediate conference is necessary to settle upon the names of the men to be appointed for the important places.

places.

No such immediate action is contemplated in the south as most of these places will not be available for some months to come and it is generally regarded here that the places will go in the south to the persons indorsed by the local Republican organization.

PROGRAM INDEFINITE.

PROGRAM INDEFINITE.

Just when any definite program will be adopted as to the Southern California positions is problematical and in the meantime there is a new batch of applicants springing up to burden the mails in both Senatorial offices.

Perhaps the announcement of the Shipping Board will expedite other appointments in the varietis departments and a complete reorganization of the staffs of most of the departments can be made by late fall except where the terms run over into next year or the following as two or three of them do. Reports were current that the appointment of a new United States marshal in the South was contemplated soon but no justification for this can be found.

BORAH AMENDMENT.

HOUSE REPUBLICAN LEADER IN FAVOR OF BROADENING IDEA ON DISARMING.

WASHINGTON, June 2.—Elimination by the House of practically all the \$98,006,000 added to the naval appropriation bill by the Senate was forecast today by Representative Kelley, Begublican, Michigan, chairman of the House conferees on the measure. He added however the measure. He added, however, that the House might yield on the Senate item for new Navy aircraft. Representative Mondell, Republican leader, said the Borah amendment probably would be retained, but undoubtedly would be broadened to include general disarmament.

PLANS COMPLETED.

The deciduous and citrus fruit growers of Washington, Oregon and California have a capital investment of more than \$300,000,000 and an annual production of more than 100,000 carloads of fruit. They have completed plans to form an all-western committee on water transportation, which will act as a control agency for the movement of fruits and vegetables to Gulf and Atlantic Coast ports by water through the Panama Canal.

Twenty-four ports already are equipped to handle the perishable fruits. The shipment to twenty-four different markets will save money for the profiters, according to present plans. Two bureaus will be established to handle the shipments, one in California to handle the citrus fruit and one in Washington to handle the deciduous fruit shipments. PLANS COMPLETED.

SMERCER

IN a market where solid transportation qualities are more and more the determining sales factor, Mercer is being discovered all over again.

Men and women, accustomed to think of it as primarily fast and "sporty" are buying it today for a host of other merits more important to them by far. We have shown them that with speed and looks go superb riding qualities, genuine economy, both of operation and upkeep, road holding ability that keeps the car tracking at all times right where the driving is best, unusual factors of safety handed down from its original racing design, and a simplicity and accessibility throughout which is delighting them possibly most of all.

You who have read this statement are interested in the Mercer car. Come in and let us show you, too, why it becomes more and more popular as simple transportation standards become more and more the factors by which automobile values are judged.

Making tires good Making discounts big

HAT the carowner never understood was why all makes of tires should have the same list price - irrespective of individual service values.

Why so many different discounts?

How can big discounts mean anything until the real worth of the tire is first established?

No straightforward answer has ever been made to these reasonable questions.

With the logical result that the experienced car-owner has calmly gone about his tire-buying in quite another way.

He is finding the par quality tire at a net price.

The tire whose value is the measure of all other tire values. The tire with stability standards-good this year, good next year, good all the time.

. . . Multiply this typical man by a million and you get an idea of how Royal Cord opinion is making itself felt-

United States Royal Cords as original equipment on the representative cars of the country.

In tire stores queries like this: "Is this tire as

As people say everywhere

United States Tires are Good Tires

good as a Royal Cord? I know a man who's in his second season with Royals."

Disinterested engineers saying that U.S. Royal Cords are the most uniform cord tires made.

Royal Cords bringing the word "quality" back with a new force, a solider meaning than it's had since tires were known.

The only final testing ground for a product and policy is the weight of public opinion.

This opinion assigns leadership today to U.S. Royal Cord Tires -not only in its physical service on the car, but as a measure of value of all other makes of tires.

small advance.

NEW YORK, June 2.—Further evidence of the stabilization of prices is at hand and the availability of the first of the surveys of price trends maintained by various official and semiofficial agencies. This particular survey shows that of twenty-six "key" commodities, sixteen showed increases during May over April, while four showed no change and only six showed further decreases.

This does not mean that an upward swing has come, for most of the increases were among articles affected by the season of the year. Others were of a character where previous decreases had been greater than general market conditions warmined. As a whole the group may be taken as indicating that the process of liquidation has reached a point where raw materials are beginning to obey conditions in their individual fields. This is the surest measure of stabilization.

PARAMOUNT is right in the midst of the big producers of Huntington Beach. Oil is flowing from nearby wells an every side. This is why Paramount ground is called proven. There seems to be no doubt on the part of the knowing ones but that Paramount will prove an investment sensation. They are scrambling for stock—business men who are conservative—men who know oil.

CUIT TO OBTAIN CONTROL OF SUPPLY IS BEGUN IN SAN FRANCISCO.

Proceedings in the action by which the municipality of Los Angeles is seeking control of an elecrical power and light supply began vesterday in San Francisco before U. S. District Judge William C. Van Fleet. It is a condemnation action against the Southern Sierras Power Company, the Mono Power Company and others. Los Angeles seeks possession of the Adams plant of the power company in the Owens River gorge in Mono county. The company has placed a valuation of \$1,000,000 on the power plant and the surrounding \$20 acres figuring in the action.

It is the contention of Los Angeles that the needs of a municipality come before those of a private enterprise, but the defendants contend that the needs of Rediands, Riverside and the Imperial Valley towns are of equal importance, since those communities depend on the Adams plant for their power.

COMANCHE OIL & REFINING COMPANY'S pr come from the company's production of both oil and casing head gas. When erected and in operation, the carbon black plant (built with the proceeds from the sale of 100,000 shares of stock) will, according to conservative estimates, increase profits by almost 100% of the total outstanding capitalization.

COMANCHE OIL & REFINING COMPANY'S dends are at the rate of 24% a year, payable 2% monthly. creased earnings will result in increased dividends, but gardless of how HIGH the dividend rate may ultimately come, it can NEVER go below 24%. THAT much is guanteed. The guarantee is ABSOLUTE, with the strength millions behind it.

The list of COMANCHE Oil. & REFINING COMPANY stockholders has grown rapidly during the past few weeks. The investing public selds has an opportunity to put money into a company which pays DIVIDENDS, except by paying EXORBITANT prices for stock. In COMANCHOIL you not only receive dividends, but receive THREE TIMES GREATER than the average dividends paid by successful companies, and SIX TIM MORE than the interest paid by a Savings Bank.

Harding Starts Work on the League Substitute

lation of Nations for

Will Give Supreme Council a Fair Chance

tion of nations with the pres-ion of the peace of the world

"INFORMAL FEELERS"
This information became known as a result of the disclosure made at the White House today that President Harding had instituted "informal feelers" with the object of ascertaining whether it would be feasible to bring about an international conference to provide means for the limitation of naval armaments. These feelers have been intrusted to Col. Harvey, Ambassader to the Court of St. James, in his capacity as the American representative on the Allied Supreme Council.

The President's action in this con-

Council.

The President's action in this connection was taken without reference to the course of the Senate last week in adopting Senator Borah's resolution, calling on the President to invite Great Britain and Japan to join the United States in a conference for the purpose of restricting naval construction by mutual agreement. The informal inquiries were instituted by Ambassador Harvey before the Senate resolution was adopted.

As far as the Senate resolution is concerned, those close to the President, who are able to reflect his views and those of the Cabinet indicate that he regards the Borah resolution rerely as an expression of the Senate's opinion that has no binding effect upon the Executive. There is ample evidence that the President resented what he construed as an effort to "force the liand of the Executive" with respect to naval disarmament, but has now reached the philosophical conclusion that it is foolish to be annoyed over any purely academic expression of Senatorial sentiment, which has no binding force and effect upon the Executive.

LEAGUE SUBSTITUTE

A very general expectation has existed that the association of nations contemplated would be an organization operating under a code of principles and rules less rigidly drawn than the covenant of the Lesgue of Nations. The President and those who advised with him on the subject, may have had this procedure in mind originally, but through a gradual process of development they have reached the conclusion that the Suprage Council presented the best means of making an association of nations a going concern.

A very general expectation has proceed to 109. 1891.

The SUCCESSIVE STEPS.

The successive steps in the President's plan for the formation of an association of nations which will have the United States as a member may be outlined as follows:

(1.) The determination of the United States to participate in the deliberations of the Supreme Council, coupled with its participation in the council of Ambassadors at Paris and Reparation Commission, organized under the terms of the Versaillies treaty.

ised under the terms of the Vermilles treaty.

(2.) The recent settlement of
the perturbing reparations question
through the Supreme Council.

(3.) The effort through the Supreme Council to bring about limitation of navia armaments by international agreement.

(4.) The organization of an international court of arbitral justice
such as was provided for by the
League of Nations covenant.

LIQUOR FOR SNYDER.

Mayor Snyder sought re-election in 1904, and in the California Voice of December 1 of that year is reprinted an appeal for votes for Snyder sent out by the Liquor Dealers' Protective Association of Los Angeles county, the heading in the Voice being. "Mr. Snyder's Saloon Support."

The letter was sent to all of the miles owners of the city by the

EW CHARGES IN WAKE OF WILSON RESIGNATION

Reported Payment of "Vice Privilege" Money May Go to Woolwine; Laws Made Police Commissioner.

Collateral to his formal written charges that "vice conditions Los Angeles are deplorable" and that Mayor Snyder knows the true situation, but has suppressed it for reasons of his own, it came known last night that former Police Commissioner Wilson n possession of evidence tending to show that money has been paid for the "vice privilege" in Sonoratown.

paid for the "vice privilege" in Sonoratown.

Mr. Wilson declined to go into details regarding the precise nature of this evidence, except to indicate that it is the result of personal investigation and interviews with the persons who say they paid this money and others who corroborate the statement. It was further intimated that the evidence will be laid before Dist. Atty. Woelwine for such action as he may see fit to take.

As TO GAMBLERS.

Independent investigations along other similar lines are also in progress, it was learned by The Times.

"In accepting the precise nature of their protection and service, and not for the Mayor feels that I was actuated by any spitcful metives. I would have said nothing if I thought my responsibility to the people and the protection of their rights in the matter was not of such paramount importance as to warrant me in even hazarding to make an enemy of the Mayor in order to acquaint the people of Los Angeles with conditions as I saw them.

The All Year Round Club is to be in every sense a Southern California institution, as its is proposed to have adequate representation from all Southern California communities and counties. Assurances of support already have been received from several near-by cities and within the next two weeks it is hoped that the organization will be completed and in possession of the first \$100,000 of its proposed \$1,000,000 fund.

In order that the Southland may receive immediate benefit from the club's advertising activities, a campaign in Arizona, New Mexico, Utah. Nevada, Texas and other States will be started at once, to be followed up by a three-year program calling for the expenditure of \$200,000 annually.

syn California will be used in the "Million-Dollar Rodeo," which will be the big feature of the afternoon program of the Actors' Fund Feetival at the Beverly Speedway tomorrow afternoon. Tom Mix, who is functioning as director-general of the rodeo and pioneer days' sports, has corralled every western actor and horseman connected with the film colony.

The riders are rehearing daily for their individual feats and for the big parts all will play in the pioneer days' spectacle when a train of prairie schooners, camped for the night after arrival at the water-hole, are attacked by Indians. Although Mix will have general supervision of the entire rodeo, Douglas Fairbanks. Bill Hart, Buck Jones. Hoot Gibson. Harry Carey, Will Rodgers. Roy Stewart, Tony Morseo and "Snowy" Baker will have the full strength of their western riders in the show and themselves taking an active part in the preliminary and general scenes and contests. The famous Tod Sioan will ride an exhibition cas-half mile on a thoroughbred.

Two hundred carpenters, scenic artisans, painters, electricians and others are working overtime to have the entire amusement city, into the other amusement city, into which the Speedway is being transfer.

REFUSES BAIL CUT IN EXPLOSIVE CASE.

After George Maynard, arrested in After George Maynard, arrested in a raid by police officers and accused of having a high explosive in his possession, was held to answer yesterday by Justice Follette. Dep. Dist. Atty. Hill caused a surprise in opposing a reduction of bail. He stated that Maynard had served two terms is prison, in New York and in San Quentin. He also said investigators are trying to determine if Maynard was connected with a sensational robbery here, when several persons were injured. The court ordered bail to remain at \$5000 and Maynard was committed

to the County Jail. LINCOLN HIGH PLAY.

Separate Maintenance Asked by Mrs. R. P. MacAlpine.

Husband Accuses Her of Plot Against Him, Charge.

Asserted Carouse by Insanity Case Victor is Told.

Victor in the past in insanity and guardianship proceedings brought against him, Reynolds P. MacAlpine, chicken fancier of Altadena receiving an income of \$20,000 a year, was served with papers by Attorneys Rupp and Gray yesterday in a suit for separate maintenance.

The action was filed by Mra, Julia MacAlpine last Friday, but in order to get service on Mr. MacAlpine, then in the Yosemite, the suit was filed secretly by order of the court.

Mrs. MacAlpine charges that since Nov. 1, 1920, her husband has at least once a week falsely accused her of being a party to a conspiracy with his so-called enemies. Last August he bought a house of fourteen rooms in Altadena. When they were ready to move to the new house. Mrs. MacAlpine asserts he refused to hire help or give her money for that purpose. Mrs. MacAlpine was compelled to unpack eighty barrels and boxes of furniture and furnishings, sweep and clean the house, wash clothes and do other work, she says.

Mr. MacAlpine bought a large number of chickens and his wife says she had to attend to them when he stayed away from home days at a time.

The complaint also charges that Mr. MacAlpine brought a man to the house and that they were accompanied by two women whose names were unknown to her and that they drank and caroused.

A further charge is made that Mr. MacAlpine has contributed for her support only \$186.65 since the first of the year. She asks \$1000 a month for her support.

Mrs. Moore, at Central Police Station, where she was questioned by Police Detectives Ziegler and Mailbeau, refused to explain her actions and declined to give her address. According to the police, Mrs. Moore was first seen by a house detective is the store as she took a quantity of fine lace from a counter. The woman is declared to have hidden the lace beneath her clothing and walked from the store. Following her to the sidewalk the detective arrived just in time to see her throw the loot into a large limousine in which two well-dressed women were seated, he says.

Rushing to the automobile the detective siezed the lace, following a struggle with the women, and then dashing into the crowd arrested Mrs. Moore, who was attempting to escape. When the police called from Central Police Station arrived the automobile had been driven away, but Mrs. Moore was being held by detectives from the store.

"I have nothing to say," declared Mrs. Moore was being held by detectives from the store.

A STRING TO IT.

Senator Poindexter says he will never agree to any limitation of armaments except with the knowledge and understanding that the United States is the belligerent equal of any power on earth. As soon as we are sure we can lick any other nation he is ready to quit making pistols. The Senator doubtless means well, but that isn't exactly the sort of talk that makes for world peace.

OPPOSITION FAILS.

Jacob Gould Schurman was confirmed as Ambassador to China in spite of the opposition of Hiram Johnson. The California Senstor happened to be absent when the name was called up for action, and as no other Senator came to his aid the confirmation was made with practically no opposition. Members of the Senate are becoming a bit shy about helping Hiram in his program of embarrassing the administration.

A No-ACCOUNT WORLD.

Prof. Shopletsh, formerly of the Mt. Wilson observatory, declares that our earth is not nearly of as much account in the scheme of creation as scientists have herelofore claimed. We are but an atom in the universe, and are some three hundred and sixty vigintillion miles away from the center of things. It will be quite a blow to some of our acreen favorities to realize that

THE SIAIGER.

Breaking records is Babe Ruth's favorite sport. When he made his fifteenth home run of the season the other day he incidentally fractured the mark of 117 home runs by one player in the big leagues made by Cravath. It was Babe Ruth's one hundred and eighteenth uninterrupted circuit of the bases. He is now the uncontested king of long-range swatsmen and may go merrily on, hanging out a fresh record every day or two.

NEEDS EDITING. Senator McKellar of Tennessee is insistent that Ambassador Harvey be recalled for the intemperate words he uttered in his first speech on British soil. The Senator says that the speech was a reflection upon the soldiers of America and should be repudiated with emphasis. The trouble with Col. Harvey is that he needs editing. With a cool and intelligent editor in the saddle, Col. Harvey might be a fine performer in the Ambassador stakes.

suced \$300,000 a year! In the true progressive spirit of celebrating this economy, however, the State blithely spends \$11,000,000 on other aisles of adventure. If John D. Rockefeller had practical thrift in this popular form he would now owe more money than is represented by the cost of the

STRONG DRINK.

Sir James Castle, an eminent British surgeon, emphatically asserts that tobacco is the least harmful of the four social vices." The other three in the order in which he names them are tea, coffee and alcohol. It would seem incumbent upon the true reformers to get together upon a program which shall free the world of its slavery to tea and coffee. John Barleycorn may have siain his thousands, but Thomas Tea and Simon Coffee have carried off their millions. Ask the doctor. He knows.

A FAST WORKER.

In the investigation of graft in connection with Chicago building construction it appears that the business agent of the electrical workers' union must have worked by electricity. At any rate ha and only electrical workers' union must have worked by electricity. At any rate he got quick action. After he had been a walking dele-gate for a few weeks he built himself a \$30,000 apartment-house. Now he owns a large hotel and has property worth in all more than half a million dollars. All this came from his savings as a hard-working union business agent for a few years. Thrift and graft make a great team when hard driven.

CIRCE IN ARMS.

Peggy Joyce must be preparing another uplift of the stage—or is it a hold-up? Affidavits in her disentanglement proceedings present her as the most accomplished adventuress of the time. Husband or lover all looked pretty much alike to this dashing graduate of the Denver telephone exchange. In either case they were simply something to be worked. According to the story of the latest husband her jewelry bill for the two years preceding last June was over \$540,000, and this did not include a string of pearls costing \$335,000 given her just nefore. Instead of having a cash balsance last year, the husband declares that he showed a deficit of \$740,000. As a spend-thrift Paggy, indicated class. It is also declared that Peggy left a string of bankrupts along her merry way and that an Army officer with whom she philandered while wedded to another blew out his small portion of brains because he could not buy Peggy the jewels which her artistic soul demanded. Peggy is a most finished product of our hectic national life. Even how she is merely warming up for a fresh start. She ought to make quite a record in the finals.

THE GREAT CONSPIRACY.
Curious, isn't it, how so many people, including high naval officials, members of his own commissions, heads of associations organized for civic betterment, church organizations—all of them men and women whose probity has never before been questioned—should have entered into a gigantic conspiracy, in cahoots with The Times, to malign the present city administration for the purpose of defeating Mayor Snyder for re-election? Events themselves, if we are to believe the Mayor's frantic apologists, are conspiring against him. An unfortunate epidemic of venereal disease, properly attributed to the approach of a comet, has been blamed upon vice conditions, which the Mayor's detractors have brutally called "deplorable."

"deplorable."

The national Republican administration has it in for the Mayor because he confided to some intimate friends before the last general election that he was for Cox. So the Navy Department received secret instructions to threaten to deny leave to members of the fleet and the local submarine base to visit Los Angeles for the sole purpose of breaking the Mayor politically. The Republican leaders saw in the Mayor the logical Democratic candidate for President in 1924; so his political ruin was imperative to continued Republican national success.

Men and women in the various church organizations became jealous of the Mayor's superior probity; so they formed a league to discredit his administration through slanderous propaganda. He had rid the city of vice; and vice was necessary in order that their organizations could campaign against it.

Members of his own commissions became on envious of his higher intelligence and

them.

And a peerless Mayor, whose pink of perfection is turning white in the public service, stands like a hero of classic tragedy, struggling against blind and ignorant forces that have combined to crush him. If you have dollars to shed prepare to shed them now for automobiles, paid workers and propaganda to defeat this hateful conspiracy.

ers and propagands to defeat this hateful conspiracy.

Rally to the defense of one who can no longer run for office, because his wind is broken and he is completely exhausted from the exertions of seven previous races, so he is now compelled to limp after it.

Police Commissioner Wilson says he resigned because he found vice conditions deplorable and that he cannot serve longer under a Mayor who strives to conceal the facts from the public in place of making an honest effort to close the vicious resorts and clean up the city. Don't believe him. He wouldn't have known anything about the existence of such conditions if he had not gone snooping round seeking for them. The city employs detectives to look after such things, and a commissioner who goes about hunting information from original sources is no gentleman. If he felt that he owed it to himself to stand from under, he was at least bound by every rule of the political code to wait until after election.

Such is a brief resume of the reasons advanced by the Mayor's claque for his reelection. They are so convincing to those who seek to be convinced that The Times submits the case without argument.

CONCORD OF SWEET SOUNDS," In devoting a week to music Los Angeles honors the most exalted of the arts and exalts herself in the paying of this honor. Among the many titles she has won, the many prizes she is seeking, no title, no prize is worthler of her aspirations than to be known everywhere as the City of Harmony and Song.

When the Creator made all things good, when the Creator made all things good, He made nothing better than music. In the "concord of sweet sounds" He gave to man-kind a source of pure delight, free from the mildew of evil thinkers, safe from the blight of the bigot or the libertine.

Music is one pleasure that can never be defiled or denatured as have been so many gifts of heaven, in themselves originally in-nocent. For music links the human and the

divine, in its appeal always sensuous, but never sensual.

Nature, moreover, seems to have designed certain favored spots on earth for the espe-cial advancement of this noble art. In cial advancement of this noble art. In places where the sunshine is continuous and kindly, where the atmosphere is clear and bracing, where cold and gloom are at a minimum, there music finds its natural habitat; and from such places spring inevitably the singers and composers, the musicians and masters of sweet harmonies, to make of life something better than a mere bread-and-butter existence.

In this connection the name of Italy at once suggests itself, the land of natural beauty and climatic excellence, the land that gave to the world Verdi, master of grand opera, and Caruso to vocalize his immortal numbers.

In the new world the south coast of Call-

immortal numbers.

In the new world the south coast of California has long been known as the Italy of America. In Southern California, also, nature has assembled the influences that create among its people the enthusiasms and inspirations from which spring master composers, master singers, whole-hearted devotees of the goddess of melody.

Southern California is centuries behind old Italy in the cultivation of music, the natural product of these mountains, valleys and seacoasts no less than of those that have made famous the Mediterranean peninsula. But the plant is growing surely and rapidly. Los Angeles has already produced composers, singers and instrumentalists of which any community might be proud. Already may be seen the promise of future Verdis and Carusos born and matured in the Italy of America.

So the devotion of a week to the service

So the devotion of a week to the service of music is a deserved tribute paid by Los Angeles to this one, and not the least, of Angeles to this one, and not the least, of her many precious birthrights. For one whole week our citizens—and visitors from other parts—will be given the opportunity of noting how much this community has already achieved in cultivating its natural musical genius, and how determined an earnest it has given of fulfilling its manifest destiny.

ounds. For eight days ascends to heaven sounds. For eight days ascends to heaven a pean of praise and thankagiving for the wondrous gift of music from a temple founded in the beginning for its worship.

Los Angeles has already contributed her share of names to the list of famous singers and composers. She has already demonstrated—by the practical proof of the box office—how thoroughly she appreciates the best and finest in musical productions. She has already subscribed herself as a liberal patron of the art by emphasizing the musical side of education in her schools and colleges.

cked by the enthusiastic co-operation of our music-lovers, has obtained for Los an our music-lovers, has obtained for Los Angeles in the Philharmonic Orchestra a combination of artists that ranks with the greatest in the United States. The Philharmonic, perhaps before every other educational effort, has elevated the musical tastes of Los Angeles by familiarising the people with the heat components through an people with the best composers through an adequate and inspiring interpretation of their mighty numbers. The debt the Philharmonic Orchestra owes to Los Angeles has thus been fully liquidated. Moreover, in other cities and communities the Philhar-monic is establishing the fame of Los Angeles among the music centers of the country. Even Boston and New York are given notice that they must look to their laurels. But Music Week is not a milestone merely to indicate how far the city has already ly to indicate how far the city has already traveled. It is a finger-post—pointing to the long, bright, shining highway still ahead of us. Nor need anyone think for a moment that, as the center of a country famed for the production and development of music, Los Angeles will fail to measure up to the standard she has set in so many other helds of enterprise.

CIGHTING DISLOYALTY.

would be not the slightest general interest in Southern California concerning the out-come of a municipal election in the city of Minneapolis. That The Times considers the Minneapolis campaign worthy of editorial observation is in itself evidence that the conditions are exceptional. Our interest is born of the fact that the principle involved in that election is one of national and In that election is one of national and patriotic, rather than sectional character. In the Minneapolis Journal of May 24 there appears a letter addressed to the voters of that city. It is signed by Victor. L. Johnson, a resident of Minneapola, but not of Minneapolis. It is an appeal to the electors of what he calls the "Queen City of the Northwest" to take into consideration the records of the two mayoralty candidates in casting their hallets. The following ayasting their ballots. The following extracts tell their own story:

tracts tell their own story:

One Sunday afternoon in June or July, sixty days or so after our country had entered the war, about 4000 people assembled in one corner of this county to take part in an antiwar demonstration. The meeting had not been publicly advertised, but in some way it seemed that every Socialist and Nonpartisan in the entire community knew of it. One thousand automobiles were parked around the local Socialist hall. The minds of the people were poisoned by the clever demagogue who addressed that throbbing, excited crowd. This meeting was the first in a series that followed shortly, and which became notorious throughout Minnesota, until finally the patriotic people of this and surrounding counties put a decided quietus to such gatherings.

Who was the speaker who started

to such gatherings.

Who was the speaker who started these notorious antiwar demonstrations? None other than this same Van Lear, who is now seeking the highest honor your city can bestow on a citisen.

Where was his opponent on that Sunday afternoon? On the way to, or getting ready to go to the battlefields of France, to fight for America in the greatest crisis of its history.

People of Minneapolis, don't you think the patriotic people of this State are somewhat interested in your decision on June 13?

On whom are you going to bestow this high honor? On the man who gave up everything, and to offer, if need be, his very life for America, or will you give it to the man who went abou nesota inflaming innocent people; peo-ple who did not realize the impropriety of taking part in these antiwar der

strations, spewing poison, creating bit-terness and discontent, which has not, even yet subsided? Reference to other Minneapolis exchanges

discloses that the radical and former pro-German elements of that city are making a mass drive to capture the municipal admin-istration. They are supported by the Non-partisan League of the Northwest. We con-fees that we do not know the national politi-cal affiliations of the two candidates. Van Lear may be a Republican and his opponent, Col. Leach, a Democrt. But that is immaterial. The campaign is being fought out on a patriotic and not a partisan issue. The elements whose triumph in the country would have resulted in the overthrow of constitutional government are apparently lined up solidly behind Van Lear. The result will determine whether the loyal American element in Minneapolis outnumbers the dis-

Minneapolis itself is on trial before the American people. A victory for Col. Leach will be a victory for genuine Americanism. We are aware that there is a heavy hyphen-ated vote in that city; but we cannot conceive that they, even though backed by the extreme radicals and the Nonpartisan Leaguers, are in the majority. We would deeply regret, as would all loyal Americans, to be forced to admit that there is a single American city of any considerable popula-

THE FILIPINO AGITATOR

The Philippines will never become another Ireland so far as our national problems are concerned. While there are a few ambitious native politicians who covet power and office, the rank and file of the people of the islands do not want to be entirely severed from Uncle Sam. They may want a liberal portion of self-govern-ment, but they wish it to be under the pro-tecting aegis of America. They do not want to be left to their own fate or devices. If they could be admitted to active partner-ship with their Uncle Sam they would like t best of all. Left to themselves there it best of all. Left to themselves there would be dissension and possibly civil war. They still need the support of a strengthening hand. The official mission of Gen. Wood and his party will result in a better understanding on both sides of the water, and will result in the Filipinos achieving uch of self-government as is best for

THE PEPTIMIST.

Pessimist and Optimist met one day and they began to discuss the merits of their respective philosophies. "Everything that is isn't," said Pessimist.

"Nothing can be set to rights."

Optimist replied: "You are wrong, friend; everything that isn't is. From nothing everything was created. For everything wrong there is a remedy."

Then Pessimist challenged him: "Come.

Then Pessimist challenged him: "Come, let us take the open road together; we will see what we shall see."

They had hardly started before they were overtaken by a stranger. His face had no trace of bitterness. Pessimist felt indifferent toward him. He was very silent; no inviting smile illumined his countenance. Optimist felt no attraction toward him. But he seemed civil enough, so they invited him to join their philosophic walk.

The three were only an hour or so on the road when they came upon a car stalled in a ditch.

"That fellow will never get that car out of that ditch in this forsaken place," said

of that ditch in this forsaken place," said Pessimist.

"Oh," replied Optimist. "He will get clear, all right. Some farmer with a team will be along by and by."

They turned to their new companion for his opinion, but in the same moment they saw him get down under the car. They watched him for some minutes. Soon he rose, covered with the dirt of the road. He said to the owner of the car: "Friend, if you will get in and take the wheel I'll shove from behind, and I think you'll pull out all right." In a few seconds the car started off. The willing stranger began to dust off his clothes with his palms. Then it occurred to the two philosophers to ask his name, for hitherto they were unaware of his cognomen.

[Wall Street Journal. DEFENSE OF FLAPPERS.

BY FREDERIC J. HASKIN, NEW YORK CITY, May 19 .-

hould the flapper, with her elabo bold and confident carriage, be sup-

feminine beauty at its most striking. Counsel for the defense asserts that it is the inalienable right of woman to make herself just as attractive as she can, that the man who is morally ruined by lipstick and silk stockings has no soul worth saving anyway, and that most of the reformers who attack feminine dress are old ladies, in spirit if not in fact, who are envious of blooming youth.

They assert that the modern fapper has done nothing less than to add to the joy and the beauty of the world by learning how to make herself attractive. You have only to look at some old picturea, they say, to realize what an enormous transformation has been worked in twenty years, and even in ten. Who, they ask, really wants to go back to the days of cotton stockings, skirst dragging in the dust, hair pulled tight and shiny nose?

DOWN WITH PAINT—SKIRTS.

DOWN WITH PAINT—SKIRTS.

For some reason, the cosmetice and clothes seem to have attracted more scandalised attention than any of the other flapperisms. Perhaps her critics feel that if she could be fully clothed and denied the use of cosmetics, reform would follow as a matter of course. At any rate, many high schools are now trying it. School authorities in various cities have recently come to the aid of diswessed parents by insisting that "immodest" clothing, rouse, powder and lipsticks be barred from the schools. In the fashionable seminaries the same sort of embargo has been hastily reared.

Yet the flapper is not without her defenders, even among her own sex. "All this hue and cry about cosmetics and clothes is, outrageously silly in my opinion," declares a New York society matron, whose sub-deb years occurred about the time of the Spanish-American War. "It's worse than that; it's base ingratitude. Why, the new flapper has performed a great service for her country by raising the standard of feminine beauty. You should have seen us back in 1330—plain and prim and proper. It was all right if you happened to be born beautiful, of course, but if you didn't happen to be, there was not a thing you could de about it. Rouge and lipsticks were out of the question, while hair dye was unmentionable, even in the family circle.

"Here, look at these," she said.

two continents at her feet. And now, today, you say, 'A trifle pretty.' but you would not have given her photograph a second glance."

As far as can be ascertained from a study of the files of old periodicala, the new type of flapper first began to appear about 1910. At that time, face powder was placed openly upon the feminine dressing table, often brazenty accompanied by a tin box of theatrical rouge. For the first time, also, silk stockings became popular for everyday wear among the women of the middle class. Before that, they had not been considered altogether respectable. With them came the Merry Widow hat, the silt skirt, bright, colors and curly hair. In the old days, if a young woman's hair was straight, it was considered an affectation to curl it.

Many things were responsible for the birth of the new era of handmade aids to beauty. The readymade women's wear industry had just started on its spectacular course of expansion, so that for the first time the great mass of women stepped from home-made, frumpy clothes into those of smarter lines. Hats could be procured much cheaper in the retail stores than they could be made by untrained milliners. But perhaps the most important factor of all was the birth of the moving-picture industry, with its curly-haired, starry-eyed heroines, which brought the art of makeup directly before the gaze of theusands of admiring flappers.

In the old days of the nineteenth century there were beauties, but they were extremely rare. That is why they created such a furore. Today, charm is so usual among the feminine population that it is the homely girl who startles. The new flappers can produce a certain amount of good looks as easily as we produce watches and breakfast food. It is no trouble at all to be stractive, if you know the art of improvement.

attractive, it you know the art of improvement.

In the old days, if a flapper had dull, mouse-colored hair or a sallow complexion, she was saddled with handicape for life. Today, a girl can choose her own complexion and coloring and buy them at the nearest beauty parlor. The new flappers, you will notice, are nearly all blond or Titian-haired. They know their henna. Their evebrows are neatly or Titian-haired. They know their henns. Their eyebrows are neatly plucked, they eyes deftly shadowed, their hair elaborately dressed, their lips smoothly crimson. And with her new beauty has come a new in-dependence, a new carriage, a new

ins beautiful women, has a similar view.

"There are no girls of any other country, even my native France, whose beauty equals that of the women of America," he says, "and I have found the most beautiful among what you call your middle class. Above the middle class beauty is rare. You will find it, to be sure, among society's elite, but it is a long, tiresome search.

"In all my travels on the continent I have yet to find any class of women to compare even favorably with the American girl. The great melting pot may be an answer to that, but whatever it is, beauty may be found in America where it cannot be found anywhere else. There seems to be an inexhaustible supply of beautiful women in this coultry."

railway wage readjustment in its direct results to the carriers and to the public, there is due to follow a result of even more stupendous moment in the indirect bearing of the reduction of operating costs. The American railway system, taken as one industrial agency, is by far the largest employer in the whole United States. When this greatest wage-payer in the country, with approximately 2,000,000 names on the pay rolls, begins a huge wage readjustment, under the supervision and by the decision of the United States government itself, to start transportation operating costs back to normal, there is no shadow of excuse for any other industry to delay longer following this overshadowing axample.—[New York Herald.

OPPOSITION FAILS.

Jacob Gould Schurman was confirmed as Ambassador to China in spite of the opposition of Hiram Johnson. The California Senator happened to be absent when the name was called up for action, and as no other Senator came to his aid the confirmation was made with practically no opposition. Members of the Senate are becoming a bit shy about helping Hiram in his program of embarrassing the administration.

NEEDS EDITING. Senator McKellar of Tennessee is insistent that Ambassador Harvey be recalled for the intemperate words he uttered in his first speech on British soil. The Senator says that the speech was a reflection upon the soldiers of America and should be repudiated with emphasis. The trouble with Col. Harvey is that he needs editing. With a cool and intelligent editor in the saddle, Col. Harvey might be a fine performer in the Ambassador stakes.

PROGRESSIVE ECONOMY.

Gov. Stephens has signed his pet reorganisation bills, and et is joyfully announced that as a result the overhead expense of State administration will be resed \$300,000 a year! The national Republican administration has it in for the Mayor because he confided to some intimate friends before the last general election that he was for Cox. "CONCORD OF SWEET SOUNDS."

In devoting a week to music Los Angeles honors the most exalted of the arts and exalts herself in the paying of this honor. Among the many titles she has won, the many prizes she is seeking, no title, no prize is worthier of her aspirations than

Harmony and Song. When the Creator made all things good, He made nothing better than music. In the "concord of sweet sounds" He gave to mankind a source of pure delight, free from the mildew of evil thinkers, safe from the blight of the bigot or the libertine.

Music is one pleasure that can never be defiled or denatured as have been so many gifts of heaven, in themselves originally innocent. For music links the human and the divine, in its appeal always sensuous, but never sensual.

Nature, moreover, seems to have designed ertain favored spots on earth for the especial advancement of this noble art. In kindly, where the atmosphere is clear and bracing, where cold and gloom are at a minimum, there music finds its natural habitat; and from such places spring inevitably the singers and composers, the musicians and masters of sweet harmonies, to make of life something better than a mere bread-

In this connection the name of Italy at conce suggests itself, the land of natural beauty and climatic excellence, the land that gave to the world Verdi, master of grand opera, and Caruso to vocalize his immortal numbers.

In the new world the south coast of Callfornia has long been known as the Italy of America. In Southern California, also, na-ture has assembled the influences that create among its people the enthusiasms and inspirations from which spring master composers, master singers, whole-hearted devotees of the goddess of melody.

Southern California is centuries behind old Italy in the cultivation of music, the natural product of these mountains, valleys and seacoasts no less than of those that and seacoasts no less than or those that have made famous the Mediterranean peninsula. But the plant is growing surely and rapidly. Los Angeles has already produced composers, singers and instrumentalists of which any community might be proud. Already may be seen the promise of future Verdis and Carusos born and ma-

tured in the Italy of America.

So the devotion of a week to the service of music is a deserved tribute paid by Los Angeles to this one, and not the least, of other parts—will be given the opportunity of noting how much this community has already achieved in cultivating its natural musical genius, and how determined an earnest it has given of fulfilling its mani-

sounds. For eight days ascends to heaven a pean of praise and thanksgiving for the wondrous gift of music from a temple founded in the beginning for its worship. Los Angeles has already contributed her share of names to the list of famous singers and composers. She has already demonstrated—by the practical proof of the box ffice-how thoroughly she appreciates the best and finest in musical productions. She has already subscribed herself as a liberal patron of the art by emphasizing the musical side of education in her schools and

The munificence of one of our citizens all our music-lovers, has obtained for Los Angeles in the Philharmonic Orchestra nation of artists that ranks with the greatest in the United States. The Philharmonic, perhaps before every other edu-cational effort, has elevated the musical tastes of Los Angeles by familiarizing the people with the best composers through an adequate and inspiring interpretation of their mighty numbers. The debt the Philharmonic Orchestra owes to Los Angeles has thus been fully liquidated. Moreover, in other cities and communities the Philhargeles among the music centers of the counnotice that they must look to their laurels. But Music Week is not a milestone merely to indicate how far the city has already traveled. It is a finger-post-pointing to the long, bright, shining highway still ahead of us. Nor need anyone think for a moment that, as the center of a country famed for the production and development of music. Los Angeles will fail to measure up to the standard she has set in so many other fields of enterprise.

It is signed by Victor. . Johnson, a resident of Minnesota, but not of Minneapolis. It is an appeal to the elec-tors of what he calls the "Queen City of the Northwest" to take into consideration the records of the two mayoralty candidates in asting their ballots. The following extracts tell their own story:

One Sunday afternoon in June or July, sixty days or so after our country had entered the war, about 4000 people assembled in one corner of this county to take part in an antiwar demonstration. The meeting had not been publicly advertised, but in some way it seemed that every Socialist and Nonpartisan in the entire community knew of it. One thousand automobiles were parked around the local Socialist hall. The minds of the people were poisoned by the clever demagogue who addressed that throbbing, excited crowd. This meeting was the first in a series that followed shortly, and which became notorious throughout Minnesota, until finally the patriotic people of this and surrounding countries put a decided quietus to such gatherings. They turned to their new companion for his opinion, but in the same moment they saw him get down under the car. They watched him for some minutes. Soon he rose, covered with the dirt of the road. He said to the owner of the car: "Friend if said to the owner of the car: "Friend, if you will get in and take the wheel I'll shove from behind, and I think you'll pull out all right." In a few seconds the car started off. The willing stranger began to dust off his clothes with his palms. Then it occurred to the two philosophers to ask his name, for hitherto they were unaware of

claim to art and beauty?

The question seems to be up for debate. The papers are full of scandalized protests against the way the flappers dress, and there are movements on foot for making high school girls, office girls, shop girls, and girls in general, dress more modestly. The reformers who are back of this movement proclaim that the morals of the American male are menaced, that he is upset and led astray by the spectacle of feminine beauty at its most striking. Counsel for the defense asserts that it is the inalienable right of woman to make herself just as attractive as she can, that the man who is morally ruined by lipstick and silk stockings has no soul worth saving anyway, and that most of the reformers who attack feminine dress are old ladies, in spirit if not in fact, who are envious of blooming youth.

They assert that the modern apper her done nothing less than

are envious of blooming youth.

They assert that the modern fiapper has done nothing less than to add to the joy and the beauty of the world by learning how to make herself attractive. You have only to look at some old pictures, they say, to realize what an enormous transformation has been worked in twenty years, and even in ten. Who, they ask, really wants to go back to the days of cotton stockings, skirst dragging in the dust, hair pulled tight and shiny nose?

DOWN WITH PAINT—SKIRTS.

DOWN WITH PAINT-SKIRTS.

DOWN WITH PAINT—SKIRTS.

For some reason, the cosmetics and clothes seem to have attracted more scandalized attention than any of the other flapperisms. Perhaps her critics feel that if she could be fully clothed and denied the use of cosmetics, reform would follow as a matter of course. At any rate, many high schools are now trying it. School authorities in various cities have recently come to the aid of discussed parents by insisting that "immodest" clothing, rouge, powder and lipsticks be barred from the schools. In the fashionable seminaries the same sort of embargo has been hastily reared.

Yet the flapper is not without her defenders, even among her own set.

"All this hue and cry about cosmetics and clothes is outrageously silly in my opinion," declares a New York society matron, whose sub-deb years occurred about the time of the Spanish-American War.

"It's worse than that; it's base ingratitude. Why, the new flapper has performed a great service for her country by raising the standard of feminine beauty. You should have seen us back in 1830—plain and prim and proper. It was all right if you happened to be born beautiful, of course, but if you didn't happen to be, there was not a thing you could de about it. Rouge and lipsticks were out of the question, while hair dye was unmentionable, even in the family circle.

mentionable, even in the family circle.

"Here, look at these," she said, handing us an old-fashioned album, containing laughable portraits of the pompadour period.

"There I am at 18," said the hostess, pointing to the photograph of a sad-eyed damsel, bearing with a patient smile the weight of a tremendous, straight pompadour. "I hate to confess it, but that is who it is. That expression of patient sweetness must have belonged to that period. I am sure it couldn't be reproduced now. Well, there is some consolation in growing eld these days—the elder we grow the better looking we become.

"Guess who that is," continued the hostess, pointing to another photograph of an old-fashioned flapper, with large eyes, straight finely chiseled nose and rather heavy chin.

"Bather pretty but insipid," said

dedicated to Her. and the men of two continents at her feet. And now, today, you say, "A trifle pretty," but you would not have given her photograph a second glance."

As far as can be ascertained from a study of the files of old periodicals, the new type of flapper first began to appear about 1910. At that time, face powder was placed openly upon the feminine dressing table, often brazenly accompanied by a tin box of theatrical rouge. For the first time, also, silk stockings became popular for everyday wear among the women of the middle class. Before that, they had not been considered altogether respectable. With them came the Merry Widow hat, the silt skirt, brightcolors and curly hair. In the old days, if a young woman's hair was straight, it was considered an affectation to curl it.

Many things were responsible for the birth of the new era of handmade aids to beauty. The readymade women's wear industry had just started on its spectacular course of expansion, so that for the first time the great mass of women stepped from home-made, frumpy clothes into those of smarter lines. Hats could be procured much cheaper in the retail stores than they could be made by untrained milliners. But perhaps the most important factor of all was the birth of the moving-picture industry, with its curly-haired, starry-eyed heroines, which brought the art of makeup directly before the gaze of thpusands of admiring flappers.

In the old days of the nineteenth century there were beauties, but they were extremely rare. That is why they created such a furore. Today, charm is so usual among the feminine population that it is the homely girl who startles. The new flappers can produce a certain amount of good looks as easily as we produce watches and breakfast food. It is no trouble at all to be attractive, if you know the art of improvement.

Great as is the importance of the railway wage readjustment in its direct results to the carriers and to the public, there is due to follow a result of even more stupendous moment in the indirect bearing of the reduction of operating costs. The American railway system, taken as one industrial agency, is by far the largest employer in the whole United States. When this greatest wagepayer in the country, with approximately 2,000,000 names on the pay rolls, begins a huge wage readjustment, under the supervision and by the decision of the United States government itself, to start transportation operating costs back to normal, there is no shadow of excuse for any other industry to delay longer following this overshadowing example.—[New York Herald. rect results to the carriers and to

The Daily Fun Hour.

BY HONOR WALSH.

ANIMAL CHARADES. These may be played in the same anner as the acting charades scribed in a former Daily Fun-Hour, or if it is to be a table game, all the players should be pro-vided with pencils and paper. The leader gives out the animal words, with a definition for each syl-lable, allowing a certain time for the completion of every word. Those who have not finished the charade when the leader (called the Keeper) gives the signal, must go on to the next word. The player who has been most successful in thinking of the right syllables and uniting them to make the animal-charades, is made Keeper for the next round. Here are six animal-charades for a beginning, with the correct anscribed in a former Daily Fun

swer:
First. My first is a vehicle, my second is a hotel, my third is fish. My all is a colorful insect. (Coachinn-eel-Cochineal.
Second. My first is a Roman number, my second signifies "before noon," my third is a funeral fire. My all is a kind of bat. (V-a-m-pyre-Yampire.)

Swimming Suits

AT the beaches everywhere—this season—from Waikiki to Narragansett, there's greater fun than ever in swimming! Why? Because the logical bathing suit—the Jantzen—has taken its place of leadership in water sports.

The Jantzen stitch makes this form fitting garment hold its shape after years of service. Patented features of tailoring insure comfort always—the Jantzen never binds, never sags.

It is made of the finest quality pure wool - dyed in the wool - and the colors are exquisite. Plain or striped, as you prefer.

Cool breezes_warm ocean

- the stimulating fragrance of the salt sea air, and the hours and days beside the blue Pacific, - are just the beginnings of summer life at San Diego, California.

You will enjoy equally the broad beaches, the clear bay, the miles of charming streets and homes, the great shaded park with seats for thousands at the daily recital on the only out-of-door pipe organ in the world, the surrounding lakes and mountains, and Old Mexico nearby.

Then there's a bewilderment of sports and recreations-motoring, swimming, boating, aquaplaning, and dancing—that unite here as nowhere else, with the advantages and comforts of a city that is the year-round home of 85,000 residents.

It's not expensive. Because you are living in a thriving, all-year city, you will find ample accommodations in modern hotels close to the bay—or a cottage or tent by the sea—with freshly gathered fruits and vegetables adding to the variety of an excellent cuisine—all at less cost than elsewhere.

Through all the coming year you will continue to enjoy your

corruption in politics and no public scandals."

The Salvation Army was active in 1903 in its efforts to wipe out "crib" conditions in Los Angeles, and in the Los Angeles Record of Aug. 20, 1903, it was stated that the police had broken up meetings of the Salvation Army held outside, of the cribs, the police acting under orders "from their superior officers." The Record article of that date concluded as follows: "Mayor Snyder permits the city to be disgraced so that some one may profit from the wages of a scarlet woman." A further article telling of "crib" conditions, printed in the California Voice of Dec. 24, 1903, was headed "Traffic in Vice Protected by Mr. Snyder."

The fight of the moral forces of the city to wipe out vice conditions in Los Angeles continued through 1904, Mr. Snyder finally being defeated that year for re-election.

LIBRARY BONDS URGED BY LEAGUE OFFICIALS.

ANTHONY PRATT, SECRETARY WORK FOR PUBLIC.

Urging the need of yoting the Public Library bonds, Anthony Pratt, secretary of the Municipal League, has voiced his appreciation of the benefits derived from the library by writing a letter of praise to the library board. Expressing his willingness to pay the meager addition to his taxes which would result from the success of the bond proposition, Mr. Pratt wrote:

"I am emphatically for the library bonds. The unostentatious, de-pendable, ever-ready service of our Public Library, like the dependable-
